## InLight Risk Management

### Innovative Risk Solutions™

Created in 1999 by leading healthcare and insurance professionals, InLight Risk Management does one thing and does it well... we help healthcare providers manage their risk more effectively so they can focus on providing quality care.

At InLight, our single focus is the healthcare industry. Rather than expand our services to attract a variety of clients, we prefer to extend greater service and more personalized attention to a narrowly targeted group. Doing business this way not only allows us to provide more innovative and cost-effective programs, but also gives us a chance to do the important things - like respond promptly to your needs.

In addition, our team is made up of both healthcare and insurance experts, enabling us to offer you clear, uncomplicated solutions in terms that make sense to you. This strategic mix of expertise and professional backgrounds gives us a more comprehensive view of your needs and how to utilize our resources to your advantage.

### *Comprehensive Product Offerings For:*

- General and Professional Liability
- Commercial Property
- Directors and Officers Liability
- Employment Practices Liability
- Commercial Crime
- Fiduciary Liability
- Regulatory E&O
- MeDefense Plus
- Workers' Compensation

### *Exclusively Servicing the Healthcare Industry*

Let InLight Risk Management evaluate your business exposures and provide you with a comprehensive insurance program solution today.
